Soham Kakra

Researcher · Agentic Systems, Harnesses & Self-Improving Agents

Eindhoven, Netherlands / sohamkakra@gmail.com / sohamkakra.com / linkedin.com/in/sohamkakra / github.com/sohamkakraa

RESEARCH | PROTOTYPE | EVALUATE

PROFILE

I study how multi-agent systems are designed: what holds them together, and what pulls them apart. Today agents tend to be either safe or useful, rarely both; I explore how to get both, and how agents could learn from their own mistakes. M.Sc. in Data Science & AI from TU/e; I test ideas by building prototypes on real data.

EXPERIENCE

Prosus — **Talent Lab Resident** — Amsterdam, Netherlands · Oct 2026 – Present

- Research the landscape of multi-agent systems ahead of placement in the ventures team, mapping current setups and where they can be improved.
- Focus on agentic architectures, agent harnesses, and self-evolving agents: how to keep agents safe without spoiling the user experience, and how they can learn from their own mistakes.
- Turn findings into prototypes that show each idea working on real data, in a team that mixes applied AI and R&D.

Prosus — **AI Intern, Master's Thesis** — Amsterdam, Netherlands · Apr 2026 – Sep 2026

- Designed and built an on-demand structuring RAG system for enterprise questions requiring cross-document aggregation, causal reasoning, and reusable follow-ups across 1,120 synthetic Jira-style tickets and anonymized internal meeting documents.
- Built deterministic code-execution aggregation, evidence-grounded graph extraction, experiment tracking, cost controls, and an evaluation framework comparing six retrieval and agentic variants with deterministic checks and a two-model judge panel.
- Own Chuck, a three-person Slack-based 3D design-and-printing project; shipped the first end-to-end demo in 3–4 weeks and generated 15+ successfully printed items from text, images, and uploaded models using 3D AI Studio and agentic CAD.

Amana Global Partners — **Research Intern** — Aug 2025

- Scouted and assessed early-stage AI companies across defence, automotive, aerospace, and adjacent sectors using investment-analysis frameworks.

IDC ABA Employment Services — **Data & AI Intern** — Jul 2025 – Aug 2025

- Built Microsoft Copilot agents for internal IT helpdesk and insurance risk-analysis workflows; also contributed to the company website redesign.

Etihad Credit Insurance — **Data Analyst & IT Support** — Dubai, United Arab Emirates · Aug 2023 – Aug 2024

- Designed Power BI dashboards for finance, risk, and HR reporting; automated multi-step data pipelines and built a SharePoint intranet for cross-team communication.

ADDITIONAL EXPERIENCE

The First Group — Learning & Development Intern · Dubai, United Arab Emirates · Nov 2022 – May 2023
Managed Totara LMS deployment and operations, then analyzed training data to report on programme effectiveness.

Apptmyz LLC — Software Developer Intern · Hyderabad, India (Remote) · Jun 2021 – Sep 2021
Developed and maintained AngularJS features for an employee-management system.

SELECTED DELIVERY

Sage Advisory `Live client delivery · sagetaxconsultancy.com`

Designed and shipped a live website for a Dubai tax advisory firm, owning structure, copy, implementation, and deployment with Next.js, Tailwind CSS, and Vercel.

EDUCATION

Eindhoven University of Technology (TU/e) — **M.Sc. Data Science & Artificial Intelligence** — Eindhoven, Netherlands · Sep 2024 – Sep 2026
Thesis at Prosus: adaptive retrieval and on-demand structure for complex enterprise queries.

Heriot-Watt University — **B.Sc. Computer Science, Artificial Intelligence Specialisation** — Dubai, United Arab Emirates · Sep 2020 – Jul 2023
With Honours, Second Class Upper Division.

TECHNICAL SKILLS

LANGUAGES & PRODUCT	Python, TypeScript, JavaScript, Next.js, React, Git
AI & EVALUATION	RAG, LLM evaluation, agentic systems, FAISS, SQLite/FTS5, NetworkX, BGE reranking, Claude and OpenAI APIs
BUILD & DEPLOY	Cursor, Claude Code, Codex, Vercel, Azure, Microsoft Power Platform, Figma
